

Coir

best for
consistently
superior
growth

Crush Coir

Besgrow Crush Coir is produced from whole raw coconut husks which are cut into medium size chips then crushed. Crush Coir is an excellent choice for growing a wide range of hydroponic crops and is an ideal additive to potting mixes. Crush Coir can also be used as a soil conditioner.

IMPROVING YOUR SUBSTRATE

Adding Crush Coir improves growing substrates by increasing their water holding ability, increasing Air Filled Porosity (AFP) and improving the overall structure of the media.

Crush Coir is a 100% natural, fresh, organic material that is supplied in a dried form. It is simple and easy to re-hydrate from bales or Gropacs. Crush's excellent water holding capacity and higher air to water ratio promotes healthy, vigorous root growth for a wide variety of vegetables and ornamentals.

DESIGNED FOR SUPERIOR RESULTS

Comprehensive quality control systems ensure a consistently high quality product that will help you achieve superior growing results.

Crush Coir is supplied in bulk plus a range of Gropac sizes that can be customised to your specific needs. Gropacs consist of compressed coir wrapped in UV treated plastic with holes cut for planting and drainage.

NATURALLY SUSTAINABLE & RENEWABLE

All Besgrow Coir products are produced from sustainable and renewable resources. The well planned cultivation and maintenance of Sri Lanka's coconut plantations ensures future sustainability.

CHARACTERISTICS

- 100% natural, organic and renewable resource
- Promotes healthy and vigorous root growth
- Increases air capacity and hydration of substrate
- Easy to re-hydrate and steer pH, EC and moisture contents
- Very stable physical structure
- Produced to Dutch RHP standards for growing media

USAGE

- Excellent additive to other growing substrates where increased hydration and air filled porosity is required
- Enhances the generative properties of potting mixes
- Soil conditioner
- Home growers
- Commercial growers

TECHNICAL

- pH 5.5 – 6.0
- EC (mS/cm) 2.0 – 2.8
- Air / Water Ratio at 7cm 30% / 70%
- 14-15 litre/kg wet volume
- Moisture <15%

PACKS

- 4 kg bales
- A wide variety of Gropac sizes are available
- Gropacs can be made to measure with pre-cut drain slits and planting holes
